PROJECTS

Software Engineering Project
Kennesaw State University

- Followed the Software Development Lifecycle (SDLC) to create, develop, and implement a simple software project with 500+ lines of code using Eclipse IDE and Java

Software Testing &Verification Project
Kennesaw State University

- Working in a small group to create 100+ software test cases for existing software projects to create various coverage reports using JUnit testing

Database Systems Project
Georgia Southern University

- Designed, implemented, and managed a database using MySQL based off published catalogs, which included fictitious information from hospitals regarding procedures and staff information

System Acquisition Design & Implementation Project
Georgia Southern University

- Created a security design Request for Proposal (RPF) for fictitious company. Proposal contained Enterprise Information Security Policy (EISP), Issue-Specific Security Policies (ISSP), Risk Management, Contingency Planning, and Information Security Awareness

Senior Capstone Project
Georgia Southern University

- Planned, designed, and implemented a website using HTML, PHP, MySQL, JavaScript, and React Native for a local car detailing business to be used by 50+ users
- Created a mobile application to provide an easy way to access website on the go (accompany website)
- Working in a small group to effectively communicate, contribute, and execute outlined project guidelines
- Contributed to the advancement of an E-Commerce website utilizing a database of product information. Website included check-out page as well as confirmation page
- Acquired self-taught experience with cross-platform React Native app development tool

SKILLS

Technical Skills: Java, C+, JavaScript, HTML, PHP, MySQL, Unity
Languages: Spanish (native), English (native)
Relevant Coursework: Data Structures & Algorithms, Foundations of Programming, E-Commerce, Requirements Engineering, Software Architecture, Software Engineer Ethics, User Interaction Engineering

EMPLOYMENT

Target, Savannah, GA	November 2016-Present

Barista (Starbucks located in-store)

- Managed a high-paced environment efficiently, handling 80+ customers per shift during peak hours and maintaining a calm demeanor under pressure
- Developed strong multitasking abilities by simultaneously taking orders, preparing drinks, and processing payments efficiently
- Trained 30+ new team members in product preparation techniques, service protocols, and company policies
